

# Brava® Mouldable Ring

Flexible and durable

## Less risk of leakage with a better fit

The most common issues that lead to leakage can be avoided with the Brava Mouldable Ring. It gives a durable seal between the stoma and the baseplate, preventing output from undermining the adhesive. As well as maintaining a better fit between the stoma and the baseplate, its durability protects the skin against stoma output.

The Brava Mouldable Ring comes in thicknesses of 2.0 mm and 4.2 mm.

Long-lasting ring

# Brava® Mouldable Ring

## Closes the gap for longer

Your patients can easily mould the Brava Mouldable Ring into the required body shape so it fits snugly around the stoma and creates a seal between the stoma and baseplate. And because it's so durable it'll work for longer.

## Hinders loosening

The Brava Mouldable Ring works excellently over dips, creases and folds – which helps create the even skin surface necessary to prevent the appliance from detaching.

## Protects and shields

The Brava Mouldable Ring absorbs skin moisture and shields against output to keep your patients' skin healthy.
